## About Me

I am a senior engineer with 5 years of experience in software development. My skills include React, Node.js, and Angular, but not limited to backend frameworks like Node.js. I have developed, implemented and deployed several web sites and applications for different clients, and I also have performed testing tasks and succeeded in my performance. I am always willing to expand my technology stack and learn from other team members.

## Experience

### Leniolabs, Remote: Frontend - Software Engineer

MAY, 2020 - NOW

- Project: Trinet-oakland.
- Web application prototype that helps companies to handle human-resources tasks.
- Implemented React components and integrated them with AWS services. I worked on a video call feature using aws chime service.
- Worked on an agile team doing daily stand up meetings and also we had meetings with the client doing a demo.
- Delivery included: React, Aws services (S3, Dynamo, Cognito, Chime).

### Shogun, Remote: Software Engineer

DEC 2019 - APR, 2020

- A web application that helps users create e-commerce web pages intuitively.
- Created a React component to handle resources navigation.
- Integrated this new component within the main application.
- Analyzed client's requirements, set delivery priorities and performed scheduled adjustments to meet delivery goals.
- Identified and performed bug fixing.
- Delivery included: React Web App, Typescript, GraphQL, Jest, Styled-Components, Storybook.

### Kimero, Remote: Software Engineer

MAR, 2019 - DEC, 2019

- Developed new features in a web application based on IoT.
- Created React components using the latest features of this library.
- Added tests to all new components and to old ones that didn't have one.

## Technologies

Javascript  
React  
Node.js  
HTML  
CSS  
Xamarin  
GraphQL  
MySQL  
TypeScript  
Jest

## Other Skills

Fast learner.  
Good teamwork.

## Languages

English: Upper -Intermediate  
Spanish: Native

- Implemented new features on the backend when it was necessary to resolve a frontend-related user story .
- Delivery included: React Web App, Node.js GraphQL API.

## **Globant, Tucumán: *Software Engineer***

NOV, 2018 – FEB, 2019

- Client: **Tyco**
- Resolved user stories implementing new Angular components.
- Improved tests methodology.
- Worked with an agile team using Scrum.
- Delivery included: Angular Web App, Typescript, Jest.

## **Integra Media S.R.L, Salta: *Software Engineer***

MAY, 2017 – NOV, 2018

- Project: **SmartBid Web**.
- This app helps general contractors to manage the construction bidding process efficiently.
- Implemented and developed the MVP from zero.
- Developed a Rest API from the ground up.
- Researched, decided and developed about the application frontend technologies.
- Followed standard and best practices in order to be consistent in backend and frontend.
- Delivery included: .Net core and Aurelia.

## **Integra Media S.R.L, Salta: *Mobile Developer***

FEB, 2015 – MAY, 2017

- Project: **SmartBid Mobile**
- Developed a mobile-native application for android devices
- Collected and analyzed the requirements of the project to set the technologies
- Ensured all tasks get completed
- Delivery included: Xamarin, Java, Android

## **Education & Training**

### **Universidad Nacional de Salta: *Bachelor of Computer Programming & System Analysis***

FEB, 2009 – DEC, 2014
